

Dubai Eat – Web Platform

Simple Functions & Features Document

Scope: Web Platform Only (Mobile Apps are not included)

Purpose	A one-stop website for discovering restaurants, dining deals, nightlife, delivery options, menus and reservations in Dubai.
Main users	Customers, restaurant/venue owners, and platform administrators.
Target scale	Designed to support 20,000+ venue records and large numbers of searchable pages.

1. Customer Website

Homepage

- Search restaurants, cafes, brunches, nightlife and food options.
- Show popular venues, current deals, featured places and useful categories.
- Show sponsored ads separately and clearly label them as “Sponsored”.

Search & Discovery

- Users can search by restaurant, cuisine, location, dish, deal or keyword.
- Search results are based on relevance, not on paid advertising.
- Organic rankings should not be changed because a business has paid for an advertisement.

Filters

- Location and area filters such as DIFC, Business Bay, JLT, Downtown and Dubai Marina.
- Cuisine filters such as Italian, sushi, steakhouse, brunch, etc.
- Deal filters: Fazza, Esaad, Emirates Platinum, Entertainer, Supperclub and Bank Cards.
- Useful filters: price range, opening time, dress code, child policy, pet-friendly, wheelchair access, terrace, rooftop, waterfront and more.

2. Restaurant / Venue Pages

Venue Profile

- Restaurant name, photos, description, address and contact details.
- Opening hours and location/map.
- Cuisine, atmosphere and important venue information.
- Daily or weekly specials and promotions.
- Chef information and media/story highlights.

Discount Information

- Clearly show accepted discount cards and bank offers.
- Examples: Fazza, Esaad, Emirates Platinum, Entertainer, Supperclub and participating UAE bank cards.
- Show discount badges on search results, venue cards, map results and venue pages.

Practical Information

- Valet parking information and cost.
- Dress code.
- Child/age policy.
- Pet policy.
- Wheelchair accessibility.
- Alcohol licence, happy hours and shisha availability where applicable.
- Michelin/Bib Gourmand/Gault&Millau; and dietary tags such as Halal, Vegan, Gluten-Free and Keto where applicable.

3. Delivery & Menu Features

Delivery Links

- Show available delivery options for each venue.
- Support links to Keeta, Deliveroo, Talabat, Careem Food, Noon Food and the restaurant's own ordering page.

Digital Menu

- Display or connect the restaurant's digital menu.
- Allow users to search for specific dishes.
- Example: find a specific dish such as truffle pasta across available venues.

4. Table Reservation

Booking

- Show available reservation options on the restaurant page.
- Support reservation services such as SevenRooms, EatApp, ReserveOut, OpenTable and Resy where the venue uses them.
- Provide WhatsApp as a fallback contact/booking option when a live reservation widget is not available.

5. Map & Location

Interactive Map

- Show restaurants and deals on a map.
- Allow users to open the venue profile from a map result.
- Support location-based discovery and nearby venue searches.

6. Smart Search / AI Assistant

AI Search

- Provide a simple chat/search assistant on the website.
- Understand multiple requirements in one question.
- Examples: "Where can I use my Fazza card for Italian in DIFC?" or "Dog-friendly terrace with a Burj Khalifa view in Business Bay open after 10 PM?"
- Return matching venues based on the user's requirements.

7. Group Food Polls

WhatsApp Group Polls

- Users can select a few restaurants as options.
- The platform can create a group voting poll for WhatsApp.
- The winning restaurant can be connected back to the booking process.

8. Merchant Portal - Restaurant Owners

Claim & Manage Listing

- Restaurant owners can claim their business listing.
- Update restaurant information, photos, menus, opening hours and offers.
- Add daily/weekly specials.
- Update accepted discount programs.

Deals & Flash Offers

- Restaurant owners can create short-term off-peak offers.
- Set the offer duration and publish it on the platform.

Analytics & Advertising

- View website traffic and listing performance.
- Purchase sponsored banner or search advertising.
- Manage paid subscription plans for enhanced restaurant pages.

9. Admin Panel

Platform Management

- Manage restaurants, categories, users, merchants and content.
- Approve or update venue information.
- Manage discount programs and deal information.
- Manage sponsored advertisements.
- Manage merchant subscriptions and payments.

Data Management

- Import and update venue information from official/public data sources.
- Maintain a large searchable venue database.
- Support automated data updates where supported by the source.

10. Revenue Features

Advertising

- Sponsored search results with a clear "Sponsored" label.
- Banner and hero advertising placements.
- Paid advertising must remain visually separate from normal search results.

Merchant Plans

- Monthly or yearly plans for enhanced restaurant pages.
- Possible plans: Basic, Pro and VIP.

Other Revenue

- Booking/table deposit fees.
- Lead commissions.
- Delivery affiliate/referral fees.
- Hotel concierge/B2B booking services.
- Event ticket sales.

11. Website SEO & Performance

SEO

- Create searchable landing pages for restaurants, locations, deals, cuisines and other useful combinations.
- Support a large SEO structure, including 20,000+ landing pages where appropriate.
- Keep organic search results independent from paid advertising.

Performance

- Target initial page load below 1.5 seconds.
- Use caching to reduce repeated API requests and operating costs.
- Use Redis and response caching where required for external services such as Google Places and AI services.

12. Main Web Platform Pages

Page	Main purpose
Home	Search, featured venues, deals and categories
Search Results	Search, filters, sorting and restaurant listings
Restaurant/Venue Profile	Full restaurant information, deals, menu, delivery and booking
Map / Nearby	Map-based venue and deal discovery
